

# AFA Safety Committee Update

APRIL 15, 2021 MEC AIR SAFETY HEALTH AND SECURITY COMMITTEE

## Safety Committee

Hello Fellow Flight Attendant's,

In anticipation of our upcoming service into Kodiak, AK., expected to begin mid-August, your AFA reps were able to participate in a proving run for the E175 last week. Here are some notes regarding the Kodiak station.

The runway is short and surrounded by mountains and water. The views are spectacular! The Kodiak station is quaint and the friendly station personnel is warm and welcoming. The terminal is small but efficient, it also has car rental facilities inside. The passenger waiting area is small but holds approximately 100 people.

There is not potable water or catering services and similar to Dillingham and King Salmon, there will not be cleaners at this station.

Enjoy the pictures!

If you have any questions, please reach out to any of your AFA representatives.

Warm Regards,

Your Air Health, Safety and Security Committee.
