Hi everyone! My name is Lauren Oster and I have been a flight attendant at Horizon for almost 7 years. I have been Seattle based my entire time, but commuted out of Burbank, CA for 4 years.

I've been happily married to my husband, Steven for 2.5 years, and we are so happy to be living in the Seattle area after living in a very fire prone area of California. When I'm not at work, I enjoy reading, trying new recipes, camping, and going to sporting events. A fun fact about me is that in college I participated in Shark Week research by creating a procedure to extract DNA from teeth fragments.

I'm excited to be volunteering with the Union in the Air Safety Health and Security committee as a representative for LEC 16. While I started at Horizon directly after college, I feel that my science background will greatly help this committee look at data and trends from Flight Attendant reports to make our workplace a safer and healthier place for everyone.

Thanks,
Lauren Oster
